Miriam Rodway

INFORMATION

Established: 1899

Individual Members: 1,850

Corporate Members: 800

Office personnel:

Objective(s):

- To be the forum for all those involved professionally in Refrigeration Science and Engineering
- To promote the technical advancement of refrigeration in all its applications, in relation both to the perfection of its methods and the minimization of its effects on the environment.
- To encourage the extension of refrigeration, air conditioning and heat pump services for the benefit of the community.
- To promote means of communication for exchange of expertise and interchange of views, and to communicate knowledge of refrigeration and its communal benefits to the outside world.
- To encourage invention and research in all matters relating to the science and practice of refrigeration.

Publications

- Annual Proceedings
- Safety Codes of Practice for A1, A2 and A3, Ammonia and Carbon Dioxide Refrigerants
- Cold Store Code of Practice
- Code of Practice for the Minimisation of Emissions
- Commercial system code of practice
- Range of Guidance notes (10)
- Range of Service engineer section publications (100)
- Range of Air conditioning and Heat Pump publications (7)
- Refrigerant Emissions and Leakage Zero guidance notes and training modules

Organization
